Short-term goal

I'd love to be someplace that has an encouraging atmosphere and flexible work environment; a workplace where employees are not treated like faces in a crowd. At this point in my life and career, I seek stability and wish to find love and excitement in my work again that has lately felt like a chore.

Oct 2013 – Nov 2014

iOS Developer

SG-iFuture Technology, Nagpur

Jan 2013 – Jun 2013

Projects

SpiderG (1193056204)

The product is aimed at individuals and organisations to help balance their personal and professional lives better. Termed as a "professional chat" application, SpiderG helps you track your expenses, maintain to-do lists, assign tasks to others, manage HR, e-invoicing for organisations and also assists in acquiring loans for SMEs.

Kover

The project was a social application for private sharing. The app linked with your Facebook and Twitter accounts allowing you to share content privately with your friends across these networks. You also got to control for how long your content existed. Also integrated was a patent pending encryption and privacy platform that ensures no third party would ever be able to decrypt your data.

Calm Down Now™ ([662018700](#))

The project was to remake an existing app designed for anxiety relief and sleep aid. It helps people suffering from anxiety, panic attacks, stress, insomnia. The app includes guided relaxation audios spoken by psychotherapist June Tomaso-Wood, and a variety of relaxing sounds that can be mixed in any combination.

e-Lala ([1078209937](#))

The project is an e-commerce application by the Confederation of All India Traders (CAIT) that allows consumers to buy products from local retailers.

Deals Right Now ([1065418690](#), [1064878400](#))

The project has two applications, one for the consumer and another for the merchant. Merchants in the New Delhi area who are attached to the service give out deals and discounts on their products. Consumers find them by their location. The apps facilitate the two parties to discover each other.

GetNearer

The project is a social networking platform with flavours of Facebook and WhatsApp. The app was initially for the Elita Promenade residents in Bangalore for discovering neighbours and helping out.

Skills

Languages	Objective-C, Swift, Python

S.S.C.	Modern School, C.B.S.E.	2003	91.8%

Interests

English	Managing [@rollingwithwords](#), a lexical page on Instagram
Cooking	Learning and preparing different dishes
Learning	Reading articles, listening to audio books, interviews, podcasts

On a personal note

I am someone who typically works well with others, I love learning from people and enjoy helping others out. I work hard when I believe in something that I am doing. I believe in quality over quantity, and try to be disciplined in my life.

Though I have primarily worked on iOS applications, I am flexible in learning and working with different technologies because variety is the spice of life. I was once asked to work on a small Python project and happily did it.

I try to be someone that has integrity and am in a flux to be a better version of myself.
